

Attaché

an essential energy solution

What is Attaché?

Attaché is a fully integrated energy management system that combines the flexibility of a spreadsheet with the security and stability of a database. From wellhead to burner-tip, through the front, middle, and back office, Attaché streamlines all of your energy operations.

What sets Attaché apart?

Designed with experience

The Attaché team is comprised of highly knowledgeable energy industry professionals with both business operations and energy software experience.

Essential basics design

Attaché provides the essential features needed for any gas trading business. Design focus is placed on fundamental business activities and ease of use, with customization provided upon request.

Implementation

A streamlined implementation approach means that Attaché can be up and running in less time than other energy systems on the market.

Flexible Deployment

Attaché is flexible enough to deploy in either a traditional server environment or across the internet.

On-going Support

The Attaché team is committed to partnering with companies to ensure optimum performance of the system from implementation to full production and beyond.

- And more!

Pipeline Scheduling

"1-2-3 Click!" Scheduling simplifies arduous tasks. The most flexible scheduling system on the market supports:

- Pathed & non-pathed models
- Multi-pipe paths
- *Real* pipeline actualization
- Seamless integration with transportation contracts
- Imbalance management
- Released capacity—zone to zone & point to point

Contract Management

Know when contracts are set to expire! Manage and track all your contract information at your fingertips. Includes support for:

- Commodity contracts
- Transportation contracts
- Management fees
- Demand and variable charges
- NAISB contract data

Pricing

Maintain your pricing data effortlessly! Store historic pricing data for in-depth analysis. Supports:

- All industry publications
- Internal price calculations
- Monthly and daily indices
- Roll-forward pricing

Accounting

Focus on the fundamentals! Attaché provides all of the basics, including:

- Invoicing
- Purchase statements
- A/R & A/P
- Cash posting
- Manual adjustments

Pipeline Infrastructure

Pre-loaded with data! Keep pipeline information accessible.

Manage and store:

- Pipeline point data
- Physical location data
- Fuel rates
- Pipeline tariff information

Reporting

It's *your* data! Get it out easily. Standard and custom reports that reflect the data you want to see. Includes:

- Fast data retrieval
- PDF output
- Hierarchical reporting
- Wide variety of standard reports

Architecture

You choose the database!

The "n-tier" technology makes Attaché amazingly flexible. Features include:

- Internet deployment options
- Robust n-tier structure
- Database neutrality
- Straightforward integration with existing systems & products

Additional Highlights

Measure your implementation time in weeks, not months!

Measure your savings in thousands of dollars!

- Pre-loaded with Industry data
- On-going support
- Easily customizable
- Scalable
- Maintain more control of your costs
- Implemented by professionals who have worked in the industry.
